

Say hi to your little one.

Pocket Island lives under your chat. Chat plays with it and it talks back. This is everything they can do, and the few things only you and your mods can.

FOR CHAT

Five commands. That's all.

Tell chat one thing: "type !pet".
They will find the rest.

Pet !pet

A happy wiggle. Counts as a pat.

Boop !boop

Snoot boop. Also counts as a pat.

Feed !feed

Snack time. Add a treat: !feed cookie. It has favourites.

Dance !dance

A little dance. Raises its energy.

Sleep !sleep

A nap. Chat can wake it again.

Paws up paws up

Just say it. Every pet answers; a Boxer throws jabs.

OR JUST TALK TO IT

"Kit, how do I feed you?"

"Kit, what are you doing?"

"Kit, what's your favourite food?"

"Kit, do you love me?"

Swap Kit for your pet's name. It knows about fifty kinds of questions and answers with what is true right now: hungry, asleep, the weather, the song.

SNACKS

<i>Pet</i>	<i>Favourite</i>	<i>Happy with</i>	<i>Nope</i>
Fox	berry	cookie, apple, chicken, fish	lemon, broccoli
Cat	fish	chicken, cheese	carrot, lemon, broccoli, lettuce
Dog	bone	bacon, chicken, cookie, apple, pizza	lemon, broccoli
Bunny	carrot	apple, lettuce, broccoli	fish, cheese, bacon, pizza
Hamster	seeds	apple, carrot, corn, broccoli	fish, lemon, cheese
Duck	peas	corn, lettuce, bread	lemon, cheese, fish, pizza

CHANNEL POINTS

Three rewards. Name them exactly.

Create them on Twitch with these titles, any cost. The widget matches the title, so "Hydrate" works for water too. Unknown rewards are ignored.

Drink Water

Walks to the water, crouches, laps with little sips, shakes off, thanks the viewer. Islands without water get a bowl.

Cooldown 45 s, then 2 min per viewer

Fart

Freezes, one small toot, a startled look at its own rear, a guilty glance at chat, a side-step.

Cooldown 3 min, then 10 min per viewer

Sneeze

A sneeze with its sound and a line to whoever redeemed it.

Cooldown 40 s, then 2 min per viewer

CELEBRATIONS

One occasion, one command.

Pick one in the widget settings. It redresses the island, dresses the pet, and unlocks a command for chat. **!celebrate** works for all of them.

Birthday

!wish

A wish and confetti. Any island.

Christmas

!gift

Unwraps a present. A little friend pops out.

 Halloween

!treat

A treat and a friendly ghost.

 Lantern night

!lantern

Lights a lantern and sends it up.

 Fireworks night

!spark

A rocket, three bursts, a flinch at each.

ALERTS

 Follow

 Sub

 Gift subs

 Cheer

 Raid

Alerts come first. Whatever the pet was doing, it stops, celebrates the person, and goes back to it. Nothing to set up: they arrive from StreamElements.

MUSIC

 Song !song

 Vibe !vibe

With the island music player on and a track playing, **!song** shows the sleeve for a few seconds and **!vibe** lets chat pile on while the pet reacts to the crowd.

BROADCASTER AND MODS ONLY

Five commands just for you.

Chat cannot use these.

Twenty seconds between rituals.

 **Start** **!petstart**

Start of stream. Wakes the pet with a big hello and clears any pause or bedtime.

 **Bedtime** **!petbed**

End of stream. A comfort toy, then a real sleep chat cannot break. Alerts still get a cheer. Only !petstart ends it.

 **Trick** **!pettrick**

A seven-second party trick. Good for a lull.

 **Pause** **!petpause**

Pauses the little scenes, even mid-scene. For a boss fight or a serious moment.

 **Resume** **!petresume**

Brings the scenes back about half a minute later.

LITTLE MOMENTS

The pet sometimes starts a small scene and asks chat to choose. First answer wins. It says what it needs when it needs it, so nobody has to memorise these.

 **The frog**

POGGERS

A laughing frog visits when the pet is free.

 **Snack thief**

!guard

Four seconds to scare the thief off the snack.

 A gift

!accept

Keep the twig the pet brings you for the stream.

 The berry

!sniff or !taste

Chat decides how brave the pet is.

 Rustling leaves

!investigate or !hide

Chat decides whether it looks.

 The bucket

!help or !caught

Chat decides how the bucket bit ends.

GOOD TO KNOW

Spam sorts itself out. One command per viewer every few seconds; the rest is quietly ignored. Twitch slow mode is still yours to set.

It remembers people for one stream. Regulars get a warmer hello. A reload of the overlay starts fresh, so save the overlay before going live, not during.

It naps when chat is quiet and wakes when someone talks. Weather and the time of day drift on their own.

It never posts in your chat. Everything it says stays in the overlay, in its speech bubble.
